Correspond with operators or submit inquiry tickets with built-in audit trail	✓	✗	✗
Property level analysis available through detailed dashboards	✓	✗	✗
Standard PDF files for easy reading and viewing	✓	✗	✗
Manage all statements with one login and password	✓	✗	✗

ALL THE BENEFITS

REVENUE CHECK DETAIL Operators have the ability to send revenue check detail. It is an electronic repository for check stub history. Our advanced tracking tool provides visibility to Operators by showing which Owners are registered. The system allows Owners to download check stub information in custom file templates for their accounting system (CDEX, .xls, .txt, etc.).

Additionally, Operators and Owners can perform property level searches allowing you to download information in Excel or view in a dashboard format.

1099 CAPABILITIES We provide an electronic repository for 1099s. Owners receive a .PDF file of important information including annual revenue, taxes and deductions pertaining to each well. The wells are broken out by state, making it simple and easy to read for the Owner. The tracking system allows Operators to view which Owners are utilizing the Revenue solution for their 1099 statements.

Inquiry Ticketing Feature Only Available with EnergyLink

↗ Inquiry tracking can be customized and includes a configurable setup for routing inquiry tickets to the correct departments or individual.

↗ The system links to check detail and Owners - allowing the inquiry to tie with the owner statement or at the property level.

↗ Owners can submit an inquiry online, which is routed to the correct department or individual.

↗ EnergyLink recognizes duplicate inquiries and flags the manager of the ticket.

RedDog Systems is dedicated to improving joint venture and owner relations business processes. We are partners to our customers and are invested in addressing the challenges that exist in our industry.

Contact us today to learn more on how you can utilize all of our tools to help ease your day-to-day joint venture business.
