AFELINK

INNOVATIVE SOLUTIONS WITH
UNPARALLELED BENEFITS

INDUSTRY LEADING RESULTS

OUR COMMITMENT IS TO
CONTINUE TO INVEST IN THE
SOLUTIONS WE OFFER AND
DRIVE INNOVATION.

WHY ENERGYLINK?

EnergyLink delivers innovative and economical cloud-based solutions supported by excellent client service. We are committed to providing solutions that transform joint venture and owner relations information sharing for the energy industry.

Our unique Software as a Service (SaaS) platform harnesses the power of advanced Electronic Data Interchange (EDI) to automate joint venture transactions between operators, partners and owners.

Drive operational efficiencies and lower costs by optimizing key business processes:

- Joint interest billings and land invoices.
- Revenue check detail, 1099s.
- Production statements.
- Authorizations for expenditures and mail ballots.

KEY BENEFITS

- **WORKFLOW AUTOMATION**
All of your operated invoices and statements flow directly to the recipient's account significantly reducing or eliminating mailing costs. Our sophisticated code mapping tool retains mappings (only map new data) to significantly speed up processing. Faster invoice processing means faster payment.
- **ENHANCED COMMUNICATION**
EnergyLink offers an advanced messaging system that allows you to communicate right down to the property level. It features real-time tracking for inquiry resolution and dispute management while maintaining a complete historical audit trail.
- **DATA ANALYTICS**
Gain critical insight with data analysis tools available. Our extensive library of Excel reports give operators, partners and owners greater insight into their data with advanced historical reporting down to a detailed level. Our user-friendly dashboards provide visualizations of items that require attention.

**OVER
80%** OF THE OIL AND GAS
INDUSTRY UTILIZE
ENERGYLINK'S SECURE
JIB MODULE.

MORE THAN JUST DATA EXCHANGE

WORK SMARTER, NOT HARDER

The energy industry is evolving and it's clear we must work smarter, reduce costs and be more efficient in our business processes. EnergyLink is the proven solution for delivering important workflow efficiencies and communication tools to operators, partners and owners. Customers only pay for what they use (no commitments).

JIBLink – EnergyLink's secure JIB module provides you the most efficient solution for uploading your operated JIB data and sending it electronically to your partners, significantly reducing the time and cost of mailing. Receive your non-operated JIB data electronically through EnergyLink where you can map, analyze and prepare your JIB data vouchers for direct upload into your accounting system.

RevenueLink – Improve owner relations by uploading your operated revenue and royalty data and tax forms to our secure online system. Send and receive your data electronically through RevenueLink to owners where you can map, analyze and prepare your voucher data for direct upload into your accounting system.

AFELink – Send AFEs, mail ballots and operations notices to partners electronically with AFELink, ensuring proper document routing and eliminating the risk of loss. Partners receive your AFEs, mail ballots and operations notices and indicate their approval responses, which you can track online and in real time.

AR Subledger – Our customized AR Subledger option combines detailed disputes from partners in EnergyLink with outstanding accounts receivable data from the operator's financial accounting system to separate disputes from other delayed payments. Save time and reduce outstanding receivables.

ABOUT US

Established in 2000, Red Dog Systems is a privately held information technology company that facilitates the exchange of data for the energy industry via cloud-based Electronic Data Interchange (EDI). Our software solutions are developed by a team of industry veterans and IT professionals who are dedicated to improving efficiency in the Energy industry and delivering excellent customer service.

“With the EnergyLink system, our jobs have become easier and less time consuming so we can focus on other aspects of our jobs. Red Dog Systems has been a great partner to work with and they make sure our needs are met.
